RE: Final results of administrative review 2013-2014 – low enriched uranium from France (A-427-818)

This is an informational message for CBP. No action is required.

1. On 09/14/2015, Commerce published in the Federal Register (80 FR 55089) its final results of its administrative review of the antidumping duty (AD) order on low enriched uranium (LEU) from France (A-427-818) for the period 02/01/2013 through 01/31/2014.

2. LEU shipments are excluded from the scope of the AD order on LEU from France if they are owned by a foreign utility end-user and imported into the United States solely for the purpose of conversion or fabrication into fuel assemblies (i.e., fuel rods), so long as such fuel assemblies (1) remain in the possession and control of the U.S. fabricator, the foreign end-user, or their designated transporter while in U.S. customs territory, (2) are exported within 18-months of entry of the LEU, for consumption by the end-user in a nuclear reactor outside the United States, and 3) the importer provides the requisite certifications, from itself and the end-user, to CBP at the time of entry (see message number 2051201, dated 02/20/2002, paragraphs 2, 5, and 6).

3. As a result of the 2013-2014 administrative review Commerce has revised the importer and end-user certifications required under the scope of the order. Accordingly, paragraph 5.C of the importer certification detailed in message number 2051201, is changed to read:

C) An amount of enriched uranium in the form of uranium dioxide equal to the accompanying entry in terms of the quantity of uranium-235 contained in this entry (less an irrecoverable processing loss not to exceed 1.0 percent), and with the same country of origin, has been or will be exported to (insert name of end-user).

In addition, paragraph 6.C of the end-user certification detailed in message number 2051201 is changed to read:

C) An amount of enriched uranium in the form of uranium dioxide equal to the accompanying entry in terms of the quantity of uranium-235 contained in this entry (less an irrecoverable processing

loss not to exceed 1.0 percent), and with the same country of origin, has been or will be exported to us by (insert name of fabricator) from the United States within eighteen (18) months.

4. Commerce will also allow the following paragraph to be added to paragraph 5 of the importer certification:

E. (Insert name of fabricator) will ensure that all samples of enriched uranium hexafluoride not consumed during testing will be either reprocessed and re-exported from the United States, or destroyed in the United States within 36 months.

5. If there are any questions by the importing public regarding this message, please contact the Call Center for the Office of AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce at (202) 482-0984. CBP ports should submit their inquiries through authorized CBP channels only. (This message was generated by OVII: AH.)

6. There are no restrictions on the release of this information.

Sherri L. Hoffman
